HANDWOVEN WIRE BASKETS

# THE KORBO BALCONY BASKET

---

The latest addition to the Korbo collection is a beautiful, ellipse shaped balcony basket. The basket is woven by hand with the unique KORBO weaving technique, celebrating 100 years this year! The balcony basket is launched in two different metals, acid proof stainless steel and galvanized steel. Both materials can be used outside all-year-around.

The Balcony basket is mounted with two hooks, easily adjusted to fit different balcony railings. It's sold as a set with a tailored Planting bag that allows excess water and rain to pass through and keep the plant moist and healthy. The hooks are removeable to give flexibility to use the basket as a standalone planter or to mount it directly on the facade as a window planter.

The balcony basket has been developed to withstand the test of time, outdoor all year around, year after year and still looking beautiful. So go ahead and utilize and decorate the extra room a balcony gives, with seasonal plants all year around. The new basket is part of the 100-year celebration of the unique Korbo basket weaving technique during 2022!

## FACTS

## ABOUT KORBO

Korbo are celebrating 100 years of craftsmanship this year! The first Korbo Basket was woven in 1922 by Einar Andersson.

Today, 100 years later, each basket is still woven by hand using the same unique technique.

In the old days, the baskets were used by fishermen and farmers or anyone who needed reliable carrying and storage that could withstand weather, wind, wear and tear. Today Korbo is characterized by high quality and a functional design. The products are crafted for everyday life and for generations to come.
